**AUTO-MOTION SHADE INC.**  
[www.automotionshade.com](http://www.automotionshade.com)

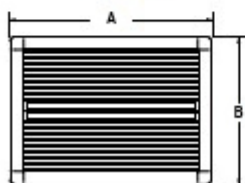

- Contemporary Day-Night shade with a small head rail and 15mm pleats, available in grey-white privacy and white or black screen fabric
- Clean, modern frame finishes off the shade and eliminates the need for valances; available in grey-white or black finish
- Allows total flexibility, from full screen during daytime to full privacy at night or any position in between
- Extremely versatile as it can be installed and operated to open/close vertically or horizontally
- 10 times quieter than regular shades\*

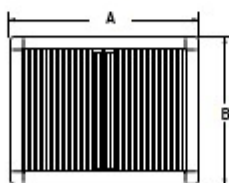

\*Based on rattling of TPS shade on normal road operation making 52.6 dB vs. regular cellular (single or double roller shade) making 72.9 dB noise. Due to the logarithm scale of dB, the difference is 10.35 times higher
